ZENTANGLES

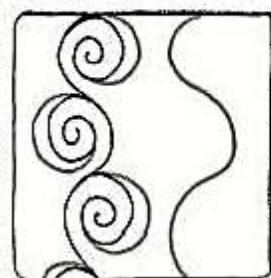

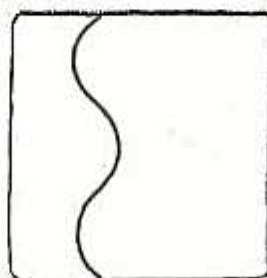

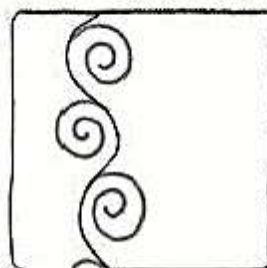

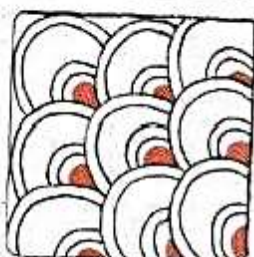

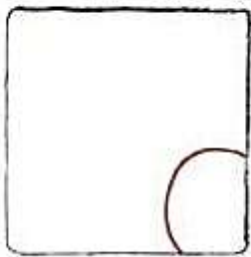

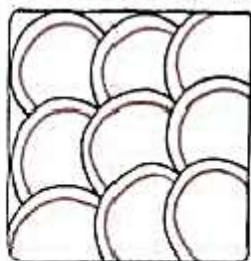

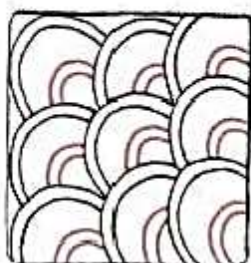

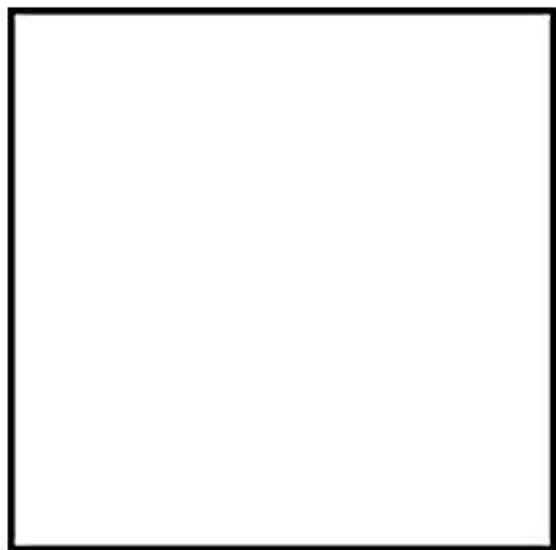

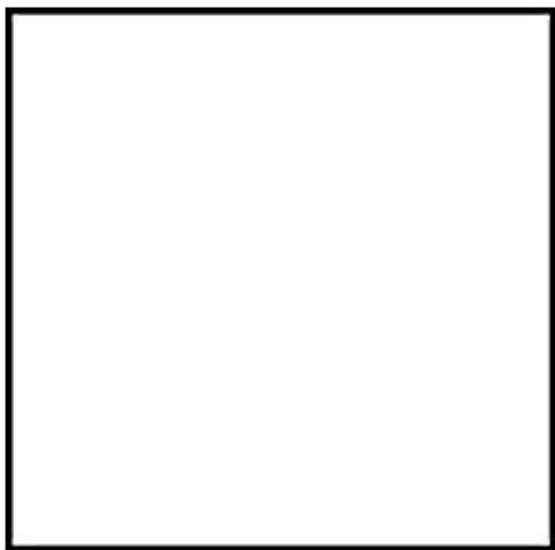

Zentangles are intricately created patterns using line and shape. The process of creating them are supposed to make you feel “zen” or peaceful. The patterns themselves create “tangles”.

Directions: In the spaces provided, attempt to copy the zentangle using the step by step instructions. Remember... every zentangle starts with a single line or shape!

In the next section, I want you to create your own Zentangle patterns in the spaces provided. Be creative and try your best. Start with a line or shape and build from there!
