

SDG Group Challenge: "Mission: Make an Impact!"

Instructions for You:

In this fun group activity, you'll learn about the **Sustainable Development Goals (SDGs)** and create your own project to help solve a global issue!

Here's what you'll do:

1. **Get into Teams:**
 - Your teacher will divide you into groups of 3-5 students.
 - Each group will get a specific **SDG** (like ending poverty or providing clean water).
2. **Research Your SDG:**
 - Look up what your SDG is all about. What problems are people facing in this area?
 - Think about why this goal is important and who it helps.
3. **Come Up with a Solution:**
 - Work together to think of a **new solution** that can help solve a problem related to your SDG.
 - Be creative! You can design a new product, start a community project, or even create an app that helps people in need.
4. **Prepare Your Presentation:**
 - Create a short presentation about your idea.
 - In your presentation, explain:
 - **What is the problem?**
 - **What is your solution?**
 - **How will your solution help?**
 - You can use slides, posters, or drawings to explain your idea clearly.
5. **Present Your Idea:**
 - You'll share your project with the class! You will act like leaders who are trying to help people understand your idea.
 - Be ready to answer questions from other students about your project.
