

ESLC/EO Grammar Review

Error Correction

April 29, 2024

Instructions: The passage below contains 20 errors of grammar, punctuation and spelling. Find and fix all 20 mistakes.

Good luck!

Rainforests

Rainforrests is a very important part of our planet. Giving us oxygen. Absorbing carbon dioxide and giving a home to 50% of the animal and plant species of the planet. Not to mention the medicenes and cures that are make from the plants that grow there.

Deforestation

Deforestation is the name give to the destroy of the rainforests and this is being done by burning them down but chopping down the trees or flooding the areas. This is happen so fast that an area the size of one football pitch is being

destroyed very minute! If this carries on at this speed, it will take less than a hundred years to destruction all the rainforests on Earth.

- 20% of world's oxygen are produced in the Amazon forrest.
- 28,000 of speces of animals are expected to become extinction in the next 25 years for deforestation.
- 50% of the tropical rainforests that we had have had alrady gone.
